PRASANTHI,

shanthireddyexp@gmail.com , +91-7893061286

PROFILE & ACHIEVEMENTS

- Around 5 years of experience in Automation Testing using Java, Selenium, Appium, and RestAssured across web, mobile, and API platforms.
- Experienced in developing end-to-end automation scripts using Selenium WebDriver, TestNG, Maven, Jenkins, and Appium.
- Over 3.4 years of hands-on experience in Appium, including writing automation scripts and inspecting elements for both Android and iOS platforms using Appium Inspector.
- Strong exposure to JIRA for defect tracking and Agile project management.
- Proficient in designing robust automation frameworks and writing optimized XPath locators to handle complex and dynamic web elements.
- Skilled in RESTful Web Service testing using RestAssured and Postman validating JSON responses, HTTP status codes, and API functionality.
- Utilized AI-powered Page Factory for intelligent locator handling and dynamic element recognition in Selenium/Appium automation.
- Used AI Page Factory to achieve self-healing locators, enhancing framework resilience and improving test stability across frequent UI changes.
- Utilized Gemini Pro AI Validator for AI-driven UI validation and visual regression testing, ensuring consistent layout, design, and responsiveness across web and mobile platforms.
- Analyzed AI-generated visual comparison reports to identify subtle UI discrepancies, collaborating with developers to maintain pixel-perfect design quality and visual integrity.
- Experienced in Cross-Browser Testing using Selenium WebDriver, TestNG, Sauce Labs, and BrowserStack.
- Strong knowledge of Core Java and OOP principles applied to automation framework design.
- Excellent **team player** with strong communication skills and a positive attitude toward learning emerging automation technologies.

EDUCATION

- Master of Computer Applications from St Ann's PG college for Women, Osmania University, 2010.

WORK EXPERIENCE:

Coforge Technologies Ltd	Senior Engineer	Apr 2025 – Till Date
Cigniti technologies Pvt Ltd	Senior Engineer	Feb 2023 – Mar 2025
Atmecs Technologies pvt ltd	Senior Software Engineer	Apr 2021 – Feb 2023
Foray Software Pvt Ltd	Software Engineer	Sep 2016 – Feb 2017

TECHNICAL SKILLS

Programming Languages	**:**	Core Java
Framework	**:**	Hybrid, DataDriven, RestAssured.
Web Services	**:**	RestAPI,
Integrated IDE's	**:**	MyEclipse, Intellij ID, VisualStudio
Automation Tools	**:**	Appium, Postman, Selenium
Version Controls	**:**	Github
Operating Systems	**:**	Windows 2000/XP, Mac, IOS, Android.
Build Tool	**:**	Maven, Bazel

ACHIEVEMENTS:

- Received "Star Contributor Award" for outstanding performance and automation framework contributions among a team of 20 members.

PROFESSIONAL EXPERIENCE

Employer:	Cigniti Pvt Ltd (Migrated to Coforge)
Project:	McD Global Mobile Automation
Client :	Mc Donald's
Role:	Senior Engineer

Responsibilities:

- Designed and enhanced a **hybrid automation framework** integrating **Selenium, Appium, and RestAssured** for web, mobile, and API testing.
- Implemented **AI Page Factory** for **self-healing locators**, improving element recognition and reducing maintenance efforts by ~40%.
- Developed **reusable REST-assured methods** and **data-driven test utilities**, ensuring high reusability and scalability.
- Automated end-to-end regression and smoke suites for mobile and API layers, improving **test coverage and execution speed**.
- Collaborated closely with developers and QA teams to **stabilize flaky tests** and ensure CI/CD pipeline integration with **Jenkins**.
- Contributed to framework enhancements by integrating **AI-based element handling**, **dynamic waits**, and **error recovery logic**.

Environment: CoreJava, TestNg, SeleniumWebdriver, Appium, GitHub actions, Eclipse,RestAssured.

Employer: Atmecs Pvt Ltd
Project: Twitter Revenue Billing
Client : Twitter
Role: Senior Software Engineer

Responsibilities:

- Automating the tasks using Selenium, appium and developed reusable functions used across the project.
- Used Dorna Framework and Bazel tool to implement and execute automation scripts.
- Working on Mac OS, emulators and simulators.
- Experience in github and commands.
- Sometimes code is reviewed using checkstyle.
- Data is collected and stored in JSON and Data driven using JSON.
- Using Java language to write code.
- Experience in writing xpath both in selenium and Appium.
- Worked on restful webservices using RestAssured.
- Used saucelabs, browserstack for cross platform.

Environment: Core Java, TestNg, Selenium webdriver, Appium, Jenkins, Intellij.

Employer: Atmecs Pvt Ltd
Project: Mopub sdk and frontend
Client : Twitter
Role: Senior Software Engineer

Responsibilities:

- Automating the tasks using Selenium, appium and developed reusable functions used across the project.
- Used Dorna Framework and Bazel tool to implement and execute automation scripts.
- Working on Mac OS, emulators and simulators.
- Experience in github and commands.
- Sometimes code is reviewed using checkstyle.
- Data is collected and stored in JSON and Data driven using JSON.
- Using Java language to write code.
- Experience in writing xpath both in selenium and Appium.

Environment: Core Java, TestNg, Selenium webdriver, Appium, Jenkins, Intellij.

Employer: Freelancer
Project: Engage Security Application
Client : Quantified Care
Period: May 2020 – Mar 2021
Role: Software Engineer

Responsibilities:

- Preparing feature files for user stories of the Application using Cucumber.
- Developed the features, scenarios, step definitions for BDD (Behavior Driven Development) using Cucumber, Gherkin.
- Elaborating the features to positive and negative scenarios with parameterized Data.
- Automating the features using Selenium and developed reusable functions used across the project
- Tests execution and Raising New Defects and Tracking Defects using Jira.
- Perform Restful API Web Service Testing using Postman tool.
- Used Jmeter tool to test web service performance and functional testing.
- Automated Test cases on Selenium with many reusable functions across the project.

Environment: Selenium , java, Maven, Jenkins, Cucumber,gherkin.

Employer: Freelancer
Project: Insure That
Client : Insure That
Period: May 2019 – Apr 2020
Role: Software Engineer

Responsibilities:

- Involved in Hybrid Automation Framework which includes TestNg and DataDriven
- Developed a detailed HTML report for each test the gets executed with fail and pass status
- Automating the tests using TestNG and developed reusable functions used across the project
- Tests execution and sharing reports
- Using TestNg and creating tests and tests execution
- Reviewing the code done by the team members
- Distributing and Collaborating the work with the team to finish the tasks in timeline
- Participated in weekly status meetings with the team, developers to discuss open issues and communicating with onsite team.

Environment: Selenium WebDriver, Java, TestNG, Git, GitHub, Jenkins

Employer: Foray Technologies pvt ltd
Project: Western Union
Client : Tata consultancy services
Role: Software Engineer

Responsibilities:

- Analyzing & validating the completeness of business requirements.
- Generating the Test scenarios and Test cases.
- Generating Regression Testscripts by extracting the requirements that need to be tested from available documentation and/or liaising with the relevant people.
- Developed Automation Test Scripts.
- Retesting defect fixes on each release build.
- Performed parameterization to implement **Hybrid framework**.
- Conduct Internal Test Case **Peer Reviews.**
- Participated in weekly status meetings with the team, developers to discuss open issues and communicating with onsite team.

Environment: Selenium WebDriver, Java, Git, GitHub, Jenkins.
